

AN INNOVATIVE SOLUTION TO  
KEEP FRIDGE/FREEZERS COLD  
DURING POWER OUTAGES

[www.pcpaustralia.com.au](http://www.pcpaustralia.com.au)

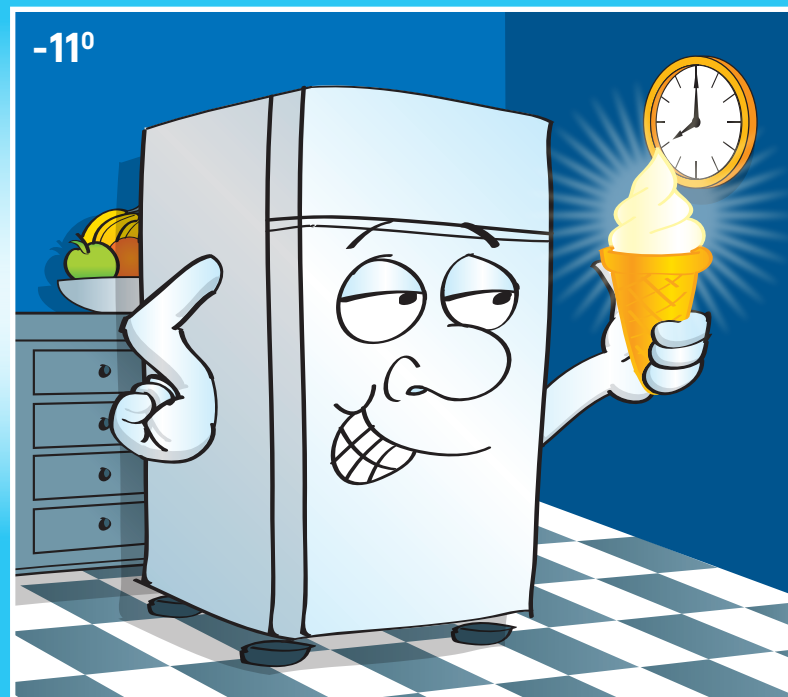

## HOW IT WORKS

- PCP Cool is a non toxic, inorganic, hydrated salt material which absorbs and releases energy.
- This material is commonly known as a Phase Change Material (PCM).

- As the temperature increases the PCM releases its stored energy, maintaining the freezers temperature stability at  $-11^{\circ}\text{C}$ .

- POWER OFF  
COMPRESSOR OFF
- PCM ABSORBS  
HEAT LOAD
- MAINTAINS  
FRIDGE/FREEZER  
TEMPERATURE
- KEEPS FOOD FRESH
- SAVES MONEY \$\$\$
